This product is warranted against any faults in materials or manufacture for 3 years from the purchase date. Limitations of warranty include: normal wear and tear; modifications or alterations, incorrect storage, corrosion, damage due to accidents or negligence, use for which this product is not specifically designed.

SPECIFIC INFORMATION

This product is intended for use in a fall arrest system to protect against the risk of falls from height.
- Personal protective equipment against falls from a height in accordance with the manufacturer's instructions.
- when it meets EN 362, to be used as component of fall arrest system for work positioning.

USE

This product should only be used as instructed (**chart A and B**) and according to the **fig 1 to 13**. Warning: certain situations may reduce the strength of the connector (**fig.2**).

Use of Karabiny by C.A.M.P. (**fig.3**) is highly recommended in order to keep the rope or webbing in position on the lower part, so avoiding the risk of rotation of the connector.

Any external pressure on the gate (for example, if a descender is clamped) is dangerous (**fig.11**).

Carabiner EN 362: the length of the connector should be taken into account when used in any fall arrest system, as it will influence the free fall distance and the force applied to the user in the event of a fall. Connectors should be used in such a way that the gate cannot ever be in contact with any edge, and the work carried out in such way as to minimize both the potential for falls and the potential fall distance. Verify the free space required beneath the user at the workplace before each occasion of use, so that, in the case of a fall, there will be no collision with the ground or the other obstacle in the fall path. A full body harness is the only acceptable body holding device that can be used in a fall arrest system. The product should only be used as instructed and no alterations should be made to it. It may be used in conditions of low visibility only if the user is familiar with the environment in question. Do not use equipment if it is damaged or if the limitations of each individual piece of equipment. This leaflet shows examples of improper
